

cvS2bVS

software for your brain

CVS2BVS

cvs2bvs.ai

**cvs2bvs is software
for your brain that
allows you to
multiply your
thinking by ten.**

cvs2bvs combines
the last decade's
breakthroughs in
AI and
neuroscience.

It takes **ten minutes to understand and learn how to use the **cvS2bVS** brain software.**

**It can be used by
any employee
24/7/365 for
solving any work
problem.**

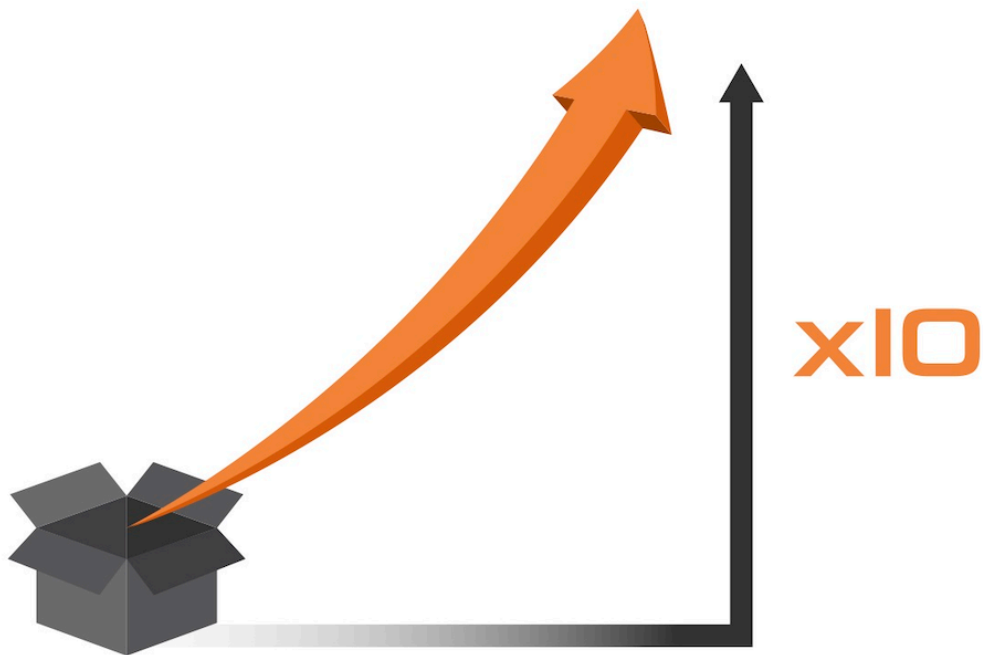

**It can be used on
any device at
work, at home
and at play.**

cvs2bvs is the
most powerful
human thinking
algorithm in over
2500 years since
the Classic
Greeks invented
binary *logic*.

**Logic is for
inside-the-box.**

**cvs2bvs is for
outside-the-box.**

**The brainpower
of cvs2bvs is now
x10 since recent
developments of
AI.**

It costs a buck a day to use and subscribe per employee.

The fee is paid by the employer.

The employer gets a better Return on Payroll (ROP).

**"One employee,
one manager,
one idea,
one insight
can change
the company."**

**- Michael Hewitt-Gleeson
School of Thinking**

**Professor Scott Galloway,
NYU School of Business
(12 July 2024).**

This millennium, thus far, could best be described as the “x10” era.

Jack Welch

Chairman of GE (1981-2001):

I wish I had a management team that really understood Michael’s x10 thinking because It’s the value-added role in the management process.

Sir Gus Nossal

**AC FRS, Chairman of the
Gates Foundation’s Discovery
Expert Group:**

I like its simplicity, its directness. I like the facets of humour. I like the design which makes it so easy to read.

Andrew Bassat

CEO and co-founder of SEEK:

I’ve gone through it on my iphone as suggested. Lots of interesting thoughts.

Professor David Penington

**AC, former Vice-Chancellor,
University of Melbourne:**

*Commendably sharp and pointed.
Easy to read.*

Larry Page

Co-founder of Google:

I live by the gospel of x10!

Peter Dale

**CEO of Volgren Marco Polo,
Australia’s largest bus
manufacturer:**

*x10 is truly such a great concept.
Easy to understand, punchy and
fresh!*

Professor German

Spangenberg

**Victorian Department of
Agriculture, AgriBio, La Trobe
University:**

“Thanks for all your amazing work in delivering a fantastic AVR x10 project. It has been a genuinely transformative initiative that will have lasting impact – I see the excitement of our AVR scientists in discovering their entrepreneurial skills, learning from each other, getting to know colleagues. Indeed, 5 start-up pitches in Term 1 alone is an exceptional achievement! And more to come in Term 2! Thanks again for making all of this possible”.

Dr George Gallup

Founder, The Gallup Poll:

I believe the School of Thinking’s work in teaching people how to think may be the most important thing going on in the world today.

Multiply Your AI By Ten

Feedback from AIXIO

By applying this in groups to real problems in the business, the staff will benefit by learning how to use and apply ChatGPT in conjunction with GBB. When do we start 😊

I trust the enthusiasm generating around the use of AI. I will hit over x10 in my ROI. This is a very conservative projection. Again, thank you so much Michael.

I just finished a conference I was running in Hawaii, and I used these concepts throughout the event. Having the availability of a brainstorming partner that keeps up with my ideas and has unlimited energy and can not be flustered, fatigued or annoyed is pretty astonishing. This revolution will allow me to test out ideas way faster than before. This is where I think I can see a 10x opportunity. The ability to take School of Thinking tools and train AI to use them and help me brainstorm really is great. It's very, very exciting. Thanks Michael for such a thought provoking and at the same time super practical training.

The most valuable benefits of the AIXIO training will be a significant improvement in my thinking skills, decision making, and clarity of direction for my post retirement consulting. I can dollarise this in terms of consultancy fees and the financial value of potential new client opportunities. Would be good to see further lessons of this type.

Following your x10 thinking, cvs2bvs and GBB I'll be developing tailored AI prompts for ChatGPT and other AI systems that will improve aspects of my life and my work as a Realtor. Look forward to the next lesson.

The course has been very helpful. It is about routinely putting aside time to think, to approach this thinking time with a certain discipline, eg 10X thinking, GBB and the like, and then supercharging this exercise with tools such as Chat GPT.

This course has laid the basic foundation I needed to start down the path to being recognized, in my locations at corporate and at some of the nonprofits I work with, as the resident expert in AI. I have already signed up for a course on building and monetizing AI based on the confidence gained here. Cheers, Michael!

I think the potential dollarisation is huge after being introduced to this course and what AI can deliver across a whole realm of themes. The trick is actually to continue this practice daily and habitually and to go forward and put the suggestions into practice and that is what I aim to do. Thanks Michael for the opportunity :)

AIX10 was very useful. I definitely will be using chatGPT and other AI platforms to scale business and profits, to save time and eliminate unnecessary work... all this is certain to 20x my impact and results!

I'll have the ability to make better decisions to help navigate a volatile and more competitive landscape. If that means I can compete more effectively for employment opportunities in a shrinking pool, the value must at least be potential professional earnings over the 36 months of some hundreds of thousands of \$\$\$\$. These projections are conservative.

The real benefit of this AIXIO training is by adapting my thinking style to facilitate ChatGPT and GBB as there is a thirst for this knowledge. It is reasonable to assume the potential effective dollarisation value of this course would be well beyond x10.
